

## EXPERIENCE

---

### Google | Software Engineer Intern

Jun 2020 – Sept 2020

- Developing a CLI application to identify commit differences between any two builds of Container Optimized OS
- Building and deploying a web application on GCP, enabling internal and external users to lookup build differences
- Working on a Gerrit plugin to find the first build featuring a given commit, assisting support workflows

### University of California, Santa Cruz | Tutor & Reader

Sept 2019 – Dec 2019

- Reinforced student understanding of core Natural Language Processing concepts through hosted lab sections
- Assisted in the implementation and debugging of coding assignments using Python, SciKit Learn, and NLTK

### IBM | Software Development Intern

Sept 2019 – Dec 2019

- Worked on a physical access management tool for monitoring privileges to 40+ data centers within IBM Cloud
- Integrated Active Directory into a compliance framework to automate AD compliance tracking and evidence collection
- Built internal tools to automate audit workflows, saving over \$10,000 annually
- Wrote unit tests to automate tools testing using Pytest

### Second Harvest Food Bank | Software Engineering Intern

Mar 2019 – Jun 2019

- Created and deployed a mobile-first web app for helping users locate foodbanks and their hours of availability
- Integrated with G Suite to generate map directions and improve accessibility for both users and maintainers

## EDUCATION

---

### Bachelor of Science, Computer Science | University of California, Santa Cruz

Jun 2017 – Jun 2020

3.81 GPA – High Honors in Major & University Honors

## ACHIEVEMENTS

---

### CruzHacks 2020 1<sup>st</sup> Place Google Cloud Category Winner | Amber Alert Dashcam App

Jan 2020

An Android dashcam app that automatically scans nearby cars for matches with active Amber Alerts. Includes a police web dashboard for tracking nearby sightings, and Notivize integration to alert police departments via email.

### HackACM 2019 3<sup>rd</sup> Place Winner | UCSC Course Tracker for Alexa & Web

Apr 2019

A UCSC class lookup service to track course openings via web browser and Amazon Alexa voice assistant.

### HackACM 2018 Student Utility Category Winner | UCSC Welcome Website

Mar 2018

A mobile website to connect incoming UCSC students with campus resources and activities.

## SELECTED PROJECTS

---

### Monitori – An Anti-Toxicity Discord Bot | Javascript, Node.js, VADER, SQLite

A user engagement bot built for the Discord chat platform to encourage positive engagement between users. Uses VADER to perform sentiment analysis and discourages negative messages through a points system. Serving over 10k users.

### Distributed Data Storage using Docker Containers | Python & Flask

A distributed remote storage solution that stores key-value pairs in a network of Docker containers in a fault-tolerant, causally consistent manner. Added data sharding capabilities and ensured crash tolerance through data replication.

### Search Engine | Python, Spacy, Natural Language Toolkit

An information retrieval system that answers user questions by creating the best excerpt from a library of texts. Employs natural language processing techniques such as dependency parsing and discourse modeling.

## SKILLS

---

### Languages:

Python, Go, Java, C, C++, Javascript, HTML, CSS, SQL, Assembly, MATLAB

### Technologies:

Google Cloud Platform, React, Node.js, Django, Flask, Pytest, NLTK, Tensorflow

### Software & Tools:

Git, Docker, Linux, JIRA, Make
